Pros: - All animals, buildings, missions, maps, etc from the first Wildlife Park game, its expansion pack and Farm World bundled together in one single game in addition to some new features (like maps etc) Cons: - Unresponsive, clunky UI. - The UI looks incredibly awful as if an 8 year old did it with MS Paint - In the original game, the UI was very well designed in a way that all the important information (like account balance, weather, visitor/animal happiness etc) were conspicuous. Now things like: - The bar that showed the average animal/people happiness - Weather information - The number of animals in the park - Shortcut icons for removing buildings etc. were removed from the ingame UI. - They got rid of tooltips (why???) - Placing objects is now very unintuitive if compared to the original game. See also this review: <https://steamcommunity.com/id/Nymbil/recommended/664120/> - The "continuous" zooming makes all sprites look distorted and blurry, i.e. UGLY. - It runs slowly - And in case you've missed it, its biggest con is ITS POORLY DESIGNED AND IMPLEMENTED USER INTERFACE. I love the original game, but they have seriously messed up this "reloaded" version.. If you like these kind of tycoon style games this is a very nice game with lots of content, levels, animals etc.. The graphics are crap

compared to the video. I am extremely disappointed with today's technology they do not need 1908's graphics. That said I would still recommend it as it's fun.. Did not run, If it ran, maybe I could give a better opinion.. If you like these kind of tycoon style games this is a very nice game with lots of content, levels, animals etc.. Zoo Constructor in Early Access : If you like Zoo Tycoons this one's for you: Zoo Constructor - Construct and manage an animal park. Economic simulation with complex animal, climate and plant simulation. The constructor has tools for soil, water, roads, fences and plants, personnel, visitor facilities and decorations available.. Version 1.0.37 live! : - herd size info listed - preferred ground type listed - deselection with right mouse button (click) - touched objects yellow marked - autoscrolling at screen margins - hint texts on build option icons - radarmap-frame - some minor bugs fixed. Version 1.0.38 live! : - shadow rendering enabled - lost mission goal text after task switching fixed - some minor bug fixes
